

### Cut & Strip Family E300

The new Cut & Strip Family E300 impresses with its high performance, optimized operability and outstanding process reliability. Different feed belts and coatings on the drive system ensure optimum transport of the cables – individually tailored to the material properties. The contact pressure on the feed unit is programmable. This allows for very fine and targeted adjustments.

### Our Award-Winning Strip Series B300

The B300 is the right choice for all those who require a particularly powerful and user-friendly strip machine. It impresses with an excellent price-performance ratio. The repeat accuracy, mechanical precision and short work cycles ensure high productivity in common stripping applications. The focus on ergonomic operation and programming via a 5" color touch screen with good accessibility further increases productivity.
